The CardPointe App.

Bring live transaction data, right to your fingertips.

Accept payments

Manage transactions

Access reports

**Create customer profiles**

Organize products

Apply gratuity

Swipe or dip, anywhere.

Extend the power of the CardPointe platform to your smartphone or tablet for the ultimate on-the-go payments experience.

SUPPORTS EMV

CardPointe Mobile makes processing and managing payments a breeze.

Payment Acceptance

The CardPointe Mobile app is both sophisticated and user-friendly. Securely accept payments with all major credit cards on your tablet or smartphone by manually entering card information, or swiping with a connected device.

Product Catalog Management

If you're interested in inputting your products and services directly into the app on your smartphone or tablet, you can activate the Catalog and Register tools to label, price and organize your inventory. That makes checkout easy, allowing you to directly select items from your customized categories and even apply discounts and gratuity to purchases.

Transaction Management

Use the Reporting Dashboard to view key sales and transaction data or access transaction history and drill into the details of a particular transaction. Easily view transaction statuses and perform actions like void, refund, re-process or emailing the customer a receipt. Even better, you can access transaction trends, such as batches by card type, authorized vs. captured and previous day sales by card type - right from your pocket!

Best-in-Class Functionality

- Filter transactions by location
- Check the amount, data/time, status and location of each batch
- Access the details of when funds are deposited into your account(s)
- See a list of all charge-backs associated with your account
- Subscribe to a number of alerts about your business, e.g. chargeback events, issued refunds and declined transactions
- View previous processing statements for any location

CardPointe can also be accessed by logging in with any browser. There, you can take advantage of recurring billing, custom reporting and organizing your products in the Catalog.
